Metric conversions of miles to Kilometres are shown in parentheses, (0.6), on the map. Conversions are rounded to the nearest tenth of a Kilometre, examples: 0.1 mile = 0.16 Kilometres or (0.2); 0.2 miles = 0.32 Kilometres or (0.3); 0.3 miles = 0.48 Kilometres or (0.5). Some equivalents may not be shown in congested areas. The examples above will be useful in determining the metric distance.
